In the Specifications:

Applicant respectfully argues that it is using the trademarks appropriately with the Specification. These trademarks identify specific languages and platforms that are used in the industry. There is no generic terminology. The marks are capitalized and are used appropriately in and proper term wherever it appears.

As the Examiner has noted Trademarks are allowed in patent applications. The Applicant has respected the proprietary nature of the marks. The usage of these marks in the application in no way adversely affects their validity as trademarks.

Applicant is still trying understand why the Examiner would fill that this usage would adversely affects their validity as trademarks. Applicant has used similar language in other applications without any issues from any other Examiner. As the Examiner pointed out, Trademarks are allowed in patent applications. Java is the only way to express that it is written in the Java language.
